

## OLD Math & Science Project

**Fact:** The surface area of Earth is about 500,000,000 kilometers squared. North America is the third largest continent with an area of about 22,500,000 kilometers squared. That's about 4.5 % of the Earth's surface area.

**Directions:** Research the following continents areas. Find the percent compared to the Earth's surface area.

Continents	Area	Decimal	Percent
Asia			
Africa			
North America	22,500,000	0.045	4.5
South America			
Antarctica			
Europe			
Oceania (Australia)			

## UPDATED Math & Science Project

**Fact:** The surface area of Earth is about 500,000,000 kilometers squared. North America is the third largest continent with an area of about 22,500,000 kilometers squared. That's about 4.5 % of the Earth's surface area.

**Directions:** Research the following continents areas. Find the percent compared to the Earth's surface area. Use the exact area. Round the decimal to the nearest thousandth and the percent to the nearest whole number.

Continents	Area	Decimal	Percent
Asia			
Africa			
North America	22,944,026	0.046	5
South America			
Antarctica			
Europe			
Oceania (Australia)
